

Eurodent

Cosmetic Dental Laboratory

Hi! My name is V.J. Lyons and 21 years ago, I founded the Eurodent Laboratory in Granada Hills, California which has grown to become one of the top cosmetic dental laboratories in the world. We specialize in custom cosmetic smile designs and have fabricated the crowns, bridges and veneers for dozens of Hollywood A-List celebrities. We are also proud to be the dental laboratory of choice for the UCLA School of Dentistry. All of our award-winning work is also custom-made in Southern California and never mass produced or outsourced abroad.

I am very proud that for the past eight years, I have had the opportunity to work with the dental practice of Drs. David Tribula and Nathalie McOmber. During that time, I have developed an extremely close working relationship with both of them and am consistently impressed with their outstanding work and their extreme attention to detail. Drs. Tribula and McOmber always meet or exceed the standards of celebrity dentists here on the West Coast.

I, together with Drs. Tribula and McOmber would be honored to help create your new Hollywood smile.

Sincerely,

V.J. Lyons
